

Mixhead LC 7

Characteristics: LC 7

- Mixer motor
 - Electric und pneumatic motor is possible
- Static and dynamic mixing is possible
- Low maintenance for the mixer drive needle
- Maximum 3 Component
- Needle valve for material outlet
= no dead spot, easy cleaning
- Stainless steel flange for mixer connection
= fast maintenance / cleaning

Current Version

New Version Revision 01

What is new at the Revision 01 ?

- smooth material flow
 - optimized material flow
 - cross section with bigger connection points
- weight reduction
- prepared for
 - temperature sensor
 - heating pin
 - pressure sensor

ATTENTION: All the current spare and wear parts can still be used!
